The Spirit of Nordisk

We have always considered Nordisk to be synonymous with **Hygge®**.
 We love bonfire conversations and how a sudden smell of smoke can always revive the laughs and stories that were once shared in a great camp.

Nature has moved much more into everybody's minds and has become the natural or digital backdrop of more meetings, conversations and gatherings than ever before. In Denmark, as in many other parts of the world, we see nursery homes, kindergartens, schools and even companies moving outside. And I'm sure this will have lasting effects on everybody.

In fact, science has now documented how being active and staying outside not only improves your perception of quality in life, it literally improves your life! You'll live longer. Happier. With improved health, more energy and more stories to pass on.

So now is the time to get outdoor and change our lives for the better. We want to inspire everyone to get a taste of nature, to make it accessible and manageable and to let the smell of bonfire smoke spread into our everyday lives, to put a smile on our faces and images in our heads. Whenever you imagine a camp, an outdoor moment, a fire and a smile - Nordisk should be right there with you. In spirit.

And to put action behind our words of being a source of inspiration, visiting Nordisk will no longer be like visiting an office. We are rethinking the entire idea of a brand headquarter and will inaugurate our new basecamp before this collection hits the shops. When you come to visit, you will witness an inspiring working campsite in Silkeborg, the Outdoor Capital of Denmark, and right next to nature.

Let's go outside - and see you out there!

Erik J. Møller

Owner & CEO (Chief Executive Outdoorer)

Designed by Nordisk

**At Nordisk we place great emphasis on design.
The goal is to make a real difference for you.
For the adventurer.**

To us, great design means that products need to do more than just look good. They need to feel good, be innovative, have a clear purpose and a high degree of functionality to serve that purpose. And finally, to be made with respect for nature. All very traditional Danish design values that are deeply rooted and respected within the whole Nordisk organization and reflected in any product bearing our iconic polar bear logo.

And most importantly; a quality product will prove to be a reliable friend for years. Making sure that our products will last, is the best way to reduce mass consumption, thus ensuring an eternal playground for adventure.

That extraordinary magical feeling of freedom, you can only experience in Nature.

Go EXPLORE. Go NORDISK.

Dedicated to our Planet

We consider Nordisk to be part of a simple ecosystem where nature is an integral part of our design process, and for that, we thank nature by acting responsibly.

Not *just* by funding an NGO.

Not *just* by removing PVC from packaging.

Not *just* by acquiring an industry standard certificate.

And not *just* by a lonesome marketing project.

For decades, Nordisk has invested in responsible production, developed internal sustainability standards that exceed industry certificates and invested in innovative materials to benefit the future of the nature we hold so dear. And we keep exploring new ways to do good while delivering quality gear that lasts a lifetime.

A responsible Partner

Nordisk is part of The Business Social Compliance Initiative, the leading business-driven initiative for companies committed to improving working conditions in the global supply chain.

We fight for the Global Goals

In 2015, world leaders agreed to 17 goals for a better world by 2030. These goals have the power to end poverty, fight inequality and stop climate change. We are excited to have joined the project where Nordisk and the UN now work closely together to reach the Global Goals for Sustainable Development.

NORDISK®
ORGANIC COTTON

HANDMADE IN GERMANY

We are very proud of our production and service facility in Görlitz where we build our down sleeping bags by hand and have done so for more than 35 years.

THE GLOBAL GOALS

DON'T POISON YOURSELF!

At Nordisk, we are working actively to reduce and eliminate the chemicals used in products and production processes. And we strive to ensure that the materials and chemicals needed, are as eco-friendly and non-harmful as possible. This goes through the entire production process, from preparation of raw materials, through the actual production (and the people engaged in it) to how the product is delivered to the end consumer.

SUSTAINABILITY BEGINS WITH PRODUCTS THAT LAST!

Certified responsible

Apart from our own strict Ethical Down Code, we obviously comply with international regulations set forth by the European Down & Feather Association and the Responsible Down Standard.

DON'T WORRY - we can fix it

Having our own manufacturing facility in Germany allows us to offer a fast and reliable repair service, ensuring your product a longer lifespan and giving new life to damaged products.

Ethical Down Code

Animal welfare, reliable traceability and exceptional quality have always been our priority when choosing our insulation fillings. So we invented our own strict down policy years before international standards were introduced, and to this day, our own Ethical Down Code is still a better protection of both animals and planet than standard certificates and legislation, such as RDS and EDFA. Every single piece of Crystal Down is traceable, washable and European. Read more on www.thedownspecialist.com.

RECYCLING FOR A BRIGHTER FUTURE

By turning used plastic bottles and fishnet into new fabrics and fibre fillings, we help remove harmful materials from nature.

A PATH UNVEILED: NYLON CAN BE GROWN

In 2014, in collaboration with Toray Inc, we developed the world's first eco-friendly down jacket. Extracting plant oil from the Ricinus plant, we have made it possible to create sustainable nylon fibres, replacing the need for crude oil that would take nature hundreds of thousands of years to form, and even longer to recover from.

NEXT TO NATURE

100% PFC FREE IS OUR GOAL

PFCs (Per-fluorinated compounds) are generally part of DWR (Durable Water Repellent) treatments due to their superior water and oil repellency. PFCs are harmful to the environment, and Nordisk is constantly working on removing all PFCs from our apparel - and we are getting closer and closer to our goal.

What's your passion?

We know that all kinds of people make great use of our products every day. People for whom the feeling of exceptional quality serves very different purposes; from luxury glamping to ultralightweight expeditions.

Finding new gear should be fun, inspiring and relevant.
So we made it easy for you.

Which is your Nordisk universe?

THE MIDGARD CONCEPT COTTON CASTLE

Imagine setting up your own holiday castle

Spending your holiday as kings and queens in nature without compromising on comfort and luxury. And leaving without a trace.

In Norse Mythology, humans lived in the realm of Midgard where a strong social bond was essential to a tribe's survival and well-being. The classic longhouses, and later the iconic stave churches, are examples of how the Vikings and their descendants designed their lives with a starting point in the community.

This has been the inspiration for creating The Midgard Concept; a completely new and more social way of sleeping outside. With a dedicated space for a community to gather and socialize and the opportunity to expand your castle with individual tents, you will experience outdoor living in ways you had never imagined.

Where are the poles?

That's right; when you are in the Midgard, the most amazing thing is actually what is not there! Gaining that amount of space and standing height (and then some!) without those annoying centre poles seem unbelievable. But the innovative Turtle Hub® construction has enabled us to create a huge space with no obstacles, so you can have the freedom of decorating your castle just the way you dream of.

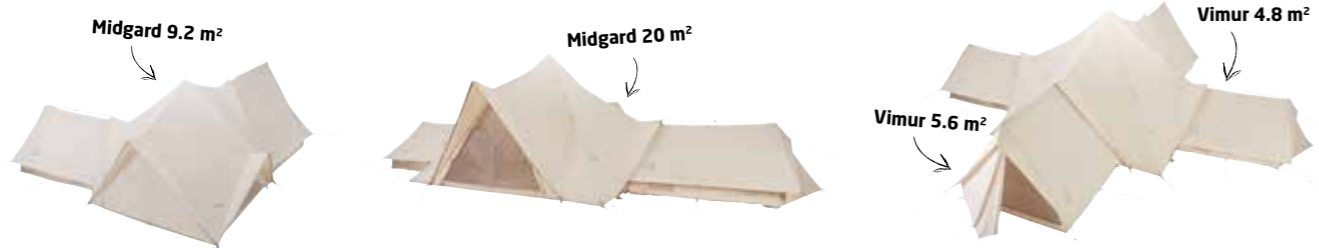

Midgard makes your camp the centre of attention

With its majestic architecture, its welcoming gates and its spacious interior, sleeping outdoors has never been more glamorous.

Build your own cotton castle camp, suiting your needs for space and separate sleeping rooms.

MIDGARD 9.2 M²

Cotton Castle Centrepiece

- 4 entrances that connect to any Midgard attachment
- Sewn-in bathtub floor
- 2.7 m central standing height
- A-frame structure with no centre pole and entrance poles

Net weight	42.500 g
Pack size	Flysheet: 46 x 110 cm Poles: 35 x 70 cm
Item no.	142033

Midgard and Vimur - made for each other

Our Nordic ancestors believed that the River Vimur was the greatest of all rivers and had existed since the beginning of time. So it makes perfect sense to name an all time greatest classic ridge tent after this particular river. But as great as the Vimur is on its own - it is even greater in combination with the Midgard centre hall or expanded with a Midgard Annex. As all products in the Midgard Concept, the Vimur attaches perfectly to form an integrated expansion.

Impress anyone who passes by.

VIMUR 4.8 M²

An amazing cotton ridge tent to use on its own or connected to the Midgard.

- Great sleeping area or maybe a storage room to keep your castle nice and tidy
- Great ventilation and indoor climate
- Full opening in each end
- A-frame structure with no centre pole

	
Colour	Sandshell
Material flysheet	Technical Cotton 65% Polyester, 35% Cotton

Item no.	142030

VIMUR 5.6 M²

Huge cotton ridge tent to use on its own or connected to the Midgard.

- Standing height makes this tent an incredibly spacious sleeping area
- Great ventilation and indoor climate
- Full opening in each end
- A-frame structure with no centre pole

	
Colour	Sandshell
Material flysheet	Technical Cotton 65% Polyester, 35% Cotton
Material groundsheet	100% waterproof Tarpaulin / sewn-in floor
Net weight	18.700 g
Pack size	Flysheet 36 x 84 cm Poles 11 x 58 cm
Item no.	142031

Midgard attachments

Expand your glamping realm!

Turn your castle into a kingdom!

With the Midgard Connector, you can now combine multiple Midgards into one construction, truly making the expansion possibilities endless. Build an entire village of halls and rooms with standing height connectors between them. Or simply connect two amazing tent halls into one.

With the Midgard Annex, you can add some extra storage or sleeping space to your Vimur or Midgard, allowing you to tuck away your bags, shoes and equipment. Use it as a sleeping cabin for overnight guests or maybe as a cozy little kids corner for a quiet moment with a great book or puzzle.

MIDGARD CONNECTOR

Midgard tunnel connector

- Hallway to fit the two door sides of any Midgard tent
- Standing height passage
- Zipper attachments in each end

Colour	Sandshell
Material flysheet	Technical Cotton, 65% Polyester, 35% Cotton
Material groundsheet	100% waterproof Tarpaulin / sewn-in floor

Material groundsheet	100% waterproof Tarpaulin / sewn-in floor
Net weight	5.700 g
Pack size	20 x 44 cm
Item no.	107271

There is only one original!

It is no challenge finding look-alikes on the market. But what is it exactly that sets Nordisk apart from the rest? Here we illustrate the visible and invisible features that make Nordisk invincible.

1. New poles in all ss23 models

All models are delivered with new strong steel poles, coated with electrostatic powder for an exclusive finish; pin-free for tents, tarp poles have strong reversible pins for extra flexibility.

Heights are easily adjustable with a double click system, supported by an intuitive guide line.

2. Styling

You can always recognize a Nordisk tent on the classic Sandshell colour, the polar bear logos and the Danish Dannebrog flag label.

Product names are always printed next to the entrance.

3. Interior

Tents and inner cabins alike are designed to offer comfortable stand-up height and optimal light conditions to inspire energy and reflect the rhythm of the day. You will find gear loops in the ceiling that can also be used to attach sleeping cabins for added privacy and room division.

4. Updated Packsack

Our new packsacks are stronger, more protective and better looking than ever. They are extremely pack friendly, so even if compression is not optimal - you still have room to get your tent in. When doing a careful compression job, you can even fit it in with the Zip-in floor attached!

5. New Windows

All new models now feature n-shaped windows with double zips that can be operated from the inside and offer increased ventilation and outlook.

Two of the windows can be removed completely and replaced with a zip-in stove exit, so you do not have to compromise your precious Nordisk tent to use the Torden Wood Burner inside (bought separately).

6. Ground Sheet

Your optional re-enforced ground sheet works as a Zip-in floor, with complete water protection and makes the Nordisk tent both much more comfortable and suitable for all-year use.

The ground sheet is pegged to the ground with strong D rings.

7. Construction

Even though we take pride in making classical and simplistic looking tents, we go out of our way for innovating with near-invisible functionality.

The patented Norisk Turtle Hub® system has helped us create pin and eyelet-free constructions that will increase strength, ease pitching and remove weak spots where water could potentially enter the construction.

In several models, we have come up with tarp-like experiences to create a 360° outlook from inside. Roll up the sides on your Asgard, open up your Midgard or try the new Utgard or Ydun Sky!

You will always find multiple ventilation options throughout the tents. The Technical Cotton fabric is extremely breathable and ensures a pleasant inner climate and a reduced or no condensation experience.

8. Lines and Loops

Throughout our tents, you will only find quality guy line mounted with strong D-rings and our innovative adjustment sliders to make sure your tent is always looking and performing at its best.

We have introduced singular peg points for easy pitching, along with strong and adjustable webbings that allow you to adjust skirts and protect them from dirt and rain.

9. Entrance

Nordisk Legacy tents always feature a large 2-layer entrance, with mosquito mesh, YKK zippers and dedicated storage space for keeping the doors open.

From SS23, a magnetic snap-closure is added to the outer door for extra convenience.

NEW Nordisk Technical Cotton

SPIRIT

The Nordisk Technical Cotton fabric is designed to offer a truly extraordinary tent experience!

The natural cotton offers a unique and breathable inner climate, and the mix with man-made fibres reduces weight and adds durability and weather performance.

2023 TC Update:

PFC free water repellent (DWR)

Adding to the natural water protection from cotton expansion, we have developed a PFC free and European produced water repellent treatment to further strengthen the performance of the Technical Cotton.

UV shield

UV radiation is the worst enemy of material deterioration. So to protect the material and extend lifetime of your tent, we have added a shield to reduce the speed of UV implications. It is called a UV absorber and is an invisible layer of protection and is completely environmentally friendly.

Skin protection - UPF factor +50

The Technical Cotton fabric construction and the engineered protective shield offer a high degree of UV skin protection from the volatile ultraviolet radiation. The factor is the highest possible and with 50+, you are protected against minimum 98% of the UV radiation.

Mold and fungus shield

Humidity, temperature fluctuations, and exposure to dirt and grime - all attack the fabric and can lead to mildew, fungicidal mold, and eventually... rot. Nordisk has added an effective protective property to the Technical Cotton which will inhibit fungus and will extend protection by as much as 75% compared to old generation technical cotton.

These invisible updates will prolong the lifetime, improve the comfort and reduce the environmental impact of our entire range of cotton tents.

NORDISK™
Fabric Defence System

Get away from it all. Feel free and lighthearted.
Sense the vibe of these iconic tents and
listen to your heartbeat slowing down.

Reconnect with Mother Nature.

Let the sun shine in

Introducing Utgard Sky and Ydun Sky

With the new Nordisk Sky opening, you will experience a whole new aspect of two classic Nordisk cotton tents. By simply unzipping the floor from the flysheet and raising the corners, you can create an open porch that invites nature into your nest. An integrated tarp solution that lets your tent truly stand out and the sun shine in.

Additionally, you will also discover that Utgard Sky and Ydun Sky can now be pitched pin-free, thus both strengthening the construction and removing any eyelets where rain could potentially enter your cabin.

An extremely spacious tent for extraordinary adventures

Vanaheim is a huge palace-like tent with two big windows in each end, lots of ground level D-windows and a large double entrance. With lots of ground area, it offers a vast range of possibilities for groups, events or a large family. Use it on a camp site or at home where you can decorate it with glamping décor for pure luxury - and if you want to install a double bed inside, the middle pole can be left out.

VANAHEIM 24/40 M²

COLOUR MY ADVENTURE

PERSONALISED. COLOURFUL. COMFORT.

THE PERFECT TENT FOR THE CREATIVE ARTIST

The Colour my Adventure concept offers you so much more than just a tent. It's your empty canvas ready for you to emphasize your personal style. Your creativity is the limit - our assortment of colourful accessories is just the beginning.

Make your tent stick out to show your personal style and as a bonus, it's much easier to find on the campsite - dare to be different and show your personality.

The concept in its simplicity: you choose your preferred tent, and then you add the tent accessories (pegs, poles, guy rope etc.) in the colour you love. Spice it up with different accessories in different colours, and you have yourself a colourful and personalized tent, ready for many new adventures.

Be prepared for
the attention
from other
campers - they
are just jealous.

New materials and innovation

Besides being a playful universe, Colour my Adventure is an innovative range of tents focusing on weight and packing size without compromising comfort. To find the perfect balance, materials are key. So, we created a whole new fabric which is a light and weather resistant cotton-like material. We added lightweight aluminium poles, pegs and trims, making you able to pack your entire Colour my Adventure tent into a backpack and carry it towards your next adventure - this has never been possible with a cotton tent before.

#ColourmyAdventure

Making camping colourful and fun - yet super easy and comfortable.

For a truly personalised camping adventure, design and functionality must go hand in hand. With the Colour my Adventure tents and tarp, you get a full-blown experience of creative design and remarkable technical features.

The must-have outdoor accessory

Expand your tent, make an outdoor dining area with a roof or use it to shelter your favorite outside spot permanently against the elements. Kari tarps compliment the rest of our cotton range and can be used either with or without a tent to protect you and your camp from rain, wind or strong sun.

KARI 8/12/20/30/41 M²

The natural need-to-have add-on for your cotton tent

- Ideal for providing shade and shelter in sunny weather
- Perfect for providing protection against wind, rain and adverse weather
- Strong webbing loops and eyelets for various attachment and setup options
- Extra fast-attach guy lines with alu hook system
- Reinforced centre points with webbing and tarpaulin patch for poles, paddles, tree branches (not applied on Kari 8)
- Use with or without a tent
- Great for gathering and living with your camping community
- Designed to fit all Nordisk cotton tents

3 AM. You wake up shivering. The temperature has turned out to be a lot lower than anticipated. Your bag is simply not warm enough.

Well... here's the answer to your frozen prayers.

Upgrade your sleeping bag by inserting a downliner that gives a temperature boost and that fluffy down feeling and feel the heat returning to your body in an instant. Or use it as a standalone product by the fire when night sets in.

And ssch! Go back to sleep, now!

Max. load	120 kg
Pack size	100 x 20 x 18 cm
Item no.	149019

Use our Aluminium Kettle or the Madam Blå Coffee Pot on top of the Torden stove when boiling water for your coffee or tea.

Sitting around a warm stove, sipping freshly-brewed coffee, talking about the experiences of the day.

This is what we call a true outdoor Hygge® moment. The fire draws you into an inner peace and relaxation. Looking at the different colours of the fire, listening to the crackling of the wood burning and feeling the heat when everything is getting colder around you. At this moment you feel alive.

Danish Design
Produced in Europe

TORDEN WOOD BURNER SET

The ultimate Hygge® experience. Get the warm and cosy atmosphere of the campfire with this Nordisk stove in a raw design.

- Outdoor wood burner
- Easily boil water for coffee or tea

Size	One size fits all
Net weight	370 g
Colour	Brown/Black
Item no.	149034

Madam Blå

A true icon
- reborn by Nordisk

Madam Blå - reborn by Nordisk

In 1895, ironmongers started making enamelled kitchen equipment and quickly got famous for their Madam Blå coffee pot. Madam Blå turned into an iconic line of kitchenware - now re-introduced by Nordisk as a celebration of its 125 years history and inevitable part of Danish Hygge culture, which deservedly earned it its place in our National Museum.

Our Madam Blå is handmade, unique and can last for generations. Every use will leave a subtle mark, so every story and every adventure can be passed on to your children and grandchildren.

At Nordisk, we love our Danish heritage and the nostalgic style, because it brings out happy memories from when we were younger, sitting at the kitchen table with our grandparents, enjoying countless Hygge® moments. Products like these keep our memories going and the longing for these Hygge® times alive.

**Madam Blå..?
Blu..? Blo..?**

The letter Å is a letter used in all scandinavian languages and was introduced in the 1400s as a combination of the letters A and O. It is pronounced closely to the sound of the A in *talk*.

Why not go all the way when designing your glamping experience? Look back at good memories and create your own while spending time with your loved ones, sipping coffee from a cup full of nostalgia. Enjoy a true Hygge® moment.

Because in the moment - we create our memories!

MADAM BLÅ COFFEE POT

The nostalgic Coffee Pot from Denmark

- Eyecatcher on every table
- Ideal for all hot and cold beverages
- All-in-one brewing station
- Detachable brewing compartment

Made for more!

You need to trust your tent like an old friend, like a true adventure buddy. So look for the qualities you would look for in a friend: sturdy, reliable and tough as nails. **Choose a tent that will never let you down.**

SVALBARD 1 PU

Sturdy tent that will never let you down

- Passed windtest for hurricane winds (40.0 m/sec)
- If the weather is too hot, then you can pitch the inner tent as a stand alone
- We have engineered the pole construction for true sit-up height
- New rip-stop fabric for extra tensile strength

Colour	Dark Olive
Material flysheet	100% Polyester, Rip-stop, PU
Net weight	2.200 g
Pack size	12 x 50 cm
Item no.	122059

SVALBARD 1 SI

Very light and packs small but performs big

- Passed windtest for hurricane winds (40.0 m/sec)
- If the weather is too hot, then you can pitch the inner tent as a stand alone
- 100% Nylon and very light

Colour	Forest Green
Material flysheet	100% Nylon, Rip-stop, 40D
Net weight	1.750 g
Pack size	15 x 45 cm
Item no.	112027

Extend the lifetime of your tent by using a footprint

You have been hiking all day, seeing nature from it's most beautiful side, and now you have found the perfect spot for your campground. This is the place where you want to camp, sleep and wake up with a freshly brewed cup of coffee while you watch the sunrise - priceless! The Halland tent has everything you need for two people - or just extra space if you are on your own journey.

HALLAND 2 PU

An aerodynamic tunnel tent with everything you need for two people

- Easy and quick to pitch - and to pack down again
- The tunnel shaped construction provides great wind stability
- Enjoy the view of the outdoors directly from your sleeping cabin through the front opening
- New rip-stop fabric for extra tensile strength

Colour	Dark Olive
Material flysheet	100% Polyester, Rip-stop, PU
Net weight	3.150 g
Pack size	15 x 50 cm
Item no.	122062

MEET OPPLAND 4

- the new member of the Oppland family!
Our most spacious trekking tent yet.

Made for the adventurous family, the crew or the group of friends that demand a proper camp, appreciate numerous features and rely on the low weight.

Extend the lifetime of your tent by using a footprint

Built for nature! Make sure to have your outdoor essentials right everytime. The Oppland tents exceed every need and simply want to be part of your adventures. These tents are brilliant on the trail and shine in camp. Go explore.
Go Nordisk. Go Oppland.

Level-Opp

OPPLAND 2/3/4

The best-in-class tunnel tent has taken a quantum leap forward with a complete redesign.

Last year, we improved the PU fabric. This season, we improved everything else. The Oppland PU is no longer just the beginner's choice - it is a true force to be reckoned with.

More spacious. Closer to nature. Easier to pitch.

Inside:

- Simplified connections between inner tent and flysheet.
- Bigger opening and mirroring of the zipper in the inner tent makes it easier to unload your gear quickly.
- We have increased the height and improved the tension of the inner tent to avoid wet sleeping bags due to contact with the fabric.
- New pockets added to the inner cabin to improve storage space.
- Ceiling cords in the cabin allow you to dry clothes or attach a mesh shelf for additional storage space.
- Additional ventilation in the inner cabin, which can be adjusted from the inside. (Only Oppland 4 PU)

AMBI
TION

Outside:

- New Architecture. We changed the pole angles to maximize space and for you to add a couple of friends to the cardgame.
- Making the door higher gives you a better entrance and a much better look at nature outside.
- By introducing polesocks, the tent can be pitched with ease by one person from one side.
- Improved pole tensioning system makes your tent stand better than ever.
- HUGE and flexible apsis entrance that adapts to any situation.
 - × Normal Opening
 - × Large Opening
 - × Partial Opening
 - × Porch Tarp Mode
- Side-entrance is bigger and higher, so you can see both in and out when crouching.
- Improved groundventilation with articulated flysheet cut.
- Tarp Ready. Integrated tarp loops on entrance to easily create an extra outdoor living space with a Nordisk Voss Tentwing tarp.

INVITE THE OUTDOORS IN!

This is pretty much an open-ended invitation to let nature join you closely wherever you go. Otra's all-mesh cabin provides a remarkable inner climate and fantastic ventilation, supported by the option to open all 4 sides of the flysheet for uninterrupted airflow and a 360 degree view of the nature around you.

Your senses will tingle, and your mind will be thanking you.

How adventurous are you?

With the introduction of our new Telemark 2.2 PU, the Telemark tent series will not only appeal to the Ultra Lightweight-focused people. Now, the ambitious adventurers will have the opportunity to get that Telemark experience, exploring the great outdoors. This technical and double layer 2-person tent still offers low weight and great durability - with a double entrance.

**So the question remains;
How adventurous are you?**

2 doors allow you to enter or exit the tent without waking each other up at night.

TELEMARK 2.2 PU

Introducing the iconic Telemark with double entrance in a new fabric

- Apsis with room for luggage or cooking
- Great ventilation for good indoor environment
- Outer doors can be turned into a canopy
- New rip-stop fabric for extra tensile strength

	Dark Olive
Material flysheet	100% Polyester, Rip-stop, PU
Net weight	1.900 g + bonus pack
Pack size	15 x 44 cm
Item no.	122058

Bonus pack included:
2 extra guy lines, 3 extra pegs, 2 canopy poles

OTRA 2 PU

Its geodesic architecture and its 90° upright walls at the foot and head create a great sensation of space, allowing you to really utilize the floor area. Even though it is only a 2 person tent, it will easily fit four people playing a game of cards with comfortable sitting height for everyone.

Making sure it will suit you in every possible situation, it can even be pitched either as a standalone flysheet or a standalone cabin, adding to Otra's already incredibly versatile feature list.

**We have already handed out the invitation.
You just have to step out to accept it.**

- Apsis on both sides for extra storage or cooking space
- Dome construction with double entry, high stability and great space utilization
- Zipper opening on all four sides for 360° panoramic view
- 3-in-1-pitch - can be set up as double layer tent, flysheet only or inner tent only
- Ceiling storage net for phone, wallet, flashlight etc.
- New rip-stop fabric for extra tensile strength

	Dark Olive
Material flysheet	100% Polyester, Rip-stop, PU
Net weight	4.350 g
Pack size	18 x 53 cm
Item no.	122063

Level up! Epic endeavors call for products you can trust. Our Nordisk tarps are all geared up and ready to take your outdoor-game to the next level! Use as a stand-alone or give your tent superpowers.

JORUND TECH BIVY

Is it a tarp? Is it a poncho? No, it's a sleeping bag. Well, actually, it's all in one - and so much more!

Jorund Tech Bivy is a real allrounder with endless possibilities for the true outdoor lover.

Jorund Tech Bivy is the perfect bivy bag. Not only will it keep you dry. Thanks to the innovative heat reflecting shell and insulating fibre filling, it keeps you warm on its own or boosts your favorite sleeping bag.

The bivy transforms into an insulated rain poncho when needed. The sewed-in zippers and concealed hood provide a comfortable fitting and the breathable shell gives you the necessary air exchange. On top of this, the special material reflects the body heat in low temperatures.

The rectangular form makes a great tarp to protect you or your essentials from the elements. The included lines are useful for a number of pitching variations.

Thanks to the the shape and many webbing loops, the Jorund Tech Bivy can even transform into an insulating underquilt.

The Jorund Tech Bivy can also be used to build a lightning fast shelter. Use logs, branches or trekking poles to pitch it in a true bushcrafting manner!

The Jorund Tech Bivy is a true allrounder with a small pack size and a low weight. It can be used for a multitude of purposes and thanks to its sturdy material, it is extremely durable.

19 webbing loops give nearly endless possibilities of how to set up the Voss Tech to provide shelter from rain, wind or sun.

VOSS TECH

AMBI
TION

We like to refer to the Voss Tech as the Swiss Army knife of shelters - use it as a tarp, a hammock, an emergency stretcher, a tent or poncho. A must-have for every bushcrafter.

The Voss tech can be used as a rain poncho which also covers your backpack. And if you are in the mood for a rest, just build yourself a solid hammock with a roof. It is easy to set up and the sturdy material can hold up to 150 kilo as a single layer hammock and up to 250 kilo as a double layer hammock.

Lightweight, small pack size, endless possibilities: the Voss Tech fits easily in every backpack and can be used for different purposes.

When you need a quick shelter from the elements, the Voss Tech can be pitched as a mini tent within minutes, using a branch or a trekking pole as your centre pole. The waterproof zipper provides an easy entrance and exit.

Puk is designed to be your reliable and high-performance sleeping bag. With all the features and technical details of its high-end siblings, it stands out as a surprisingly great purchase.

Go Explore. Go Nordisk. Go Puk.

-----------------	-----

Worlds lightest fully-functional tarp. No nonsense. No compromise. No doubt.

Ridiculously small. Unbelievably light.

The further you have to go, the more you will love yourself for bringing the Lofoten along. We designed this award winning ultra lightweight race tent to meet the demands for a reliable shelter that you can pitch in an instant, carry without noticing and pack in the bottle pockets on your race vest.

The Lofoten ULW is not made to be big. It is made to be fast. So, are you willing to sacrifice extra space for extra pace?

VOSS 2 LW

Lightweight tarp for quick fix or as a tentwing for Nordisk Lofoten and Telemark tents.

- Extreme small pack size and lightweight. The flysheet weight is only 80 grams.
- Fully functional tarp with 5 attachment points.
- Including 4 fast-attach guy lines, each with guy line slide and Mini Hook.
- Compatible tentwing for the LW tent range.

	VOSS 2 LW
Colour	Forest Green
Material flysheet	100% Nylon, Rip-stop
Measurements	184 x 230 cm
Net weight	100 g / 130 g incl. 2 guy lines / 140 g incl. all 4 guy lines
Pack size	15 x 15 cm
Item no.	117023

VOSS 5 LW

Lightweight tarp for 1 person or as an add-on to the Nordisk LW tent Range.

- Extreme small pack size and lightweight. The flysheet weight is only 170 grams.
- Fully functional tarp with 8 attachment points.
- Including 6 fast-attach guy lines, each with guy line slide and Mini Hook.
- Compatible with the LW Tent range.

	VOSS 5 LW
Colour	Forest Green
Material flysheet	100% Nylon, Rip-stop
Measurements	18 x 10 cm
Net weight	170 g / 190 g incl. 2 guy lines / 240 g incl. all 6 guy lines
Pack size	15 x 20 cm
Item no.	117015

VOSS 7 LW

Lightweight 2 persons multi functional tarp.

- Extreme small pack size and lightweight. The flysheet weight is only 280 grams.
- Fully functional tarp with 12 attachment points.
- Including 6 fast-attach guy lines, each with guy line slide and Mini Hook.
- Can be put up as a ridge tarp, open shelter, tent or as a closed end hammock tarp.
- Compatible with the LW Tent range.

	VOSS 7 LW

Trim weight: Excl. packsacks, footend pole and bonus pack. Regular weight: All included except the bonus pack.

LOFOTEN EXTRA CABINS

The Lofoten flysheet is identical for the 2 versions, so by changing the cabin you can have either more space in the cabin or more space in the apsis. Available as an additional purchase.

FOR RACING WITHOUT COMPROMISE

This year, we celebrate the 10 year anniversary of the original Nordisk Telemark

A tent so light that you can bring it anywhere, so small that you can always fit it into your bag, and so spacious that you can stay, sit and sleep effortlessly while keeping your belongings dry too.

You can even prepare your racefood under the door if you need to. This is the ideal combination of weight reduction, comfort and performance (and a bucket load of awards...).

The Original.

Often imitated, never duplicated.

The trekker's choice

When you are away for more than just a few days, there is such a thing as too lightweight.

So we have designed these two lightweight wonders that offer a surprising amount of space for bags, shoes and cooking, but weigh less than your Pocket stove and three tins of tomatoes.

And it will take a serious storm to knock them over!

HALLAND 2 LW

Go superlight, superstrong and keep your belongings dry

- Small apsis for shoes, bags etc.
- Outer pitched so it can be used as a standalone shelter
- This trekkers choice weighs only 1.360 g

	
Colour	Forest Green / Burnt Red

Temperature	-10° -18° -38° / -20° -28° -48°
Special feature	120 mm WP all around

Innovation on the shoulder of giants

Making the world's most reliable sleeping bag for extreme conditions is not something you do over night. We have been handcrafting sleeping bags for polar expeditions since 1983, and the Arctic is the tip of the iceberg. Beneath the surface is the knowledge and experience from iconic bags such as the Powerizer and the Fusion that have faithfully served expeditioners through decades of freezing camps in hostile environments.

TAYLORMADE®

Customized for your adventure

Standard models feature -18° and -28° limit temperature ratings which would cover most needs for an ultrawarm sleeping bag. But **if you are going extreme, you can count on us to go with you.** We will adjust the filling to any target temperature you need or even sew it to fit your height, if needed.

Slim down your race weight.
Maximize your storage space.
Simply. Go. Ultra.

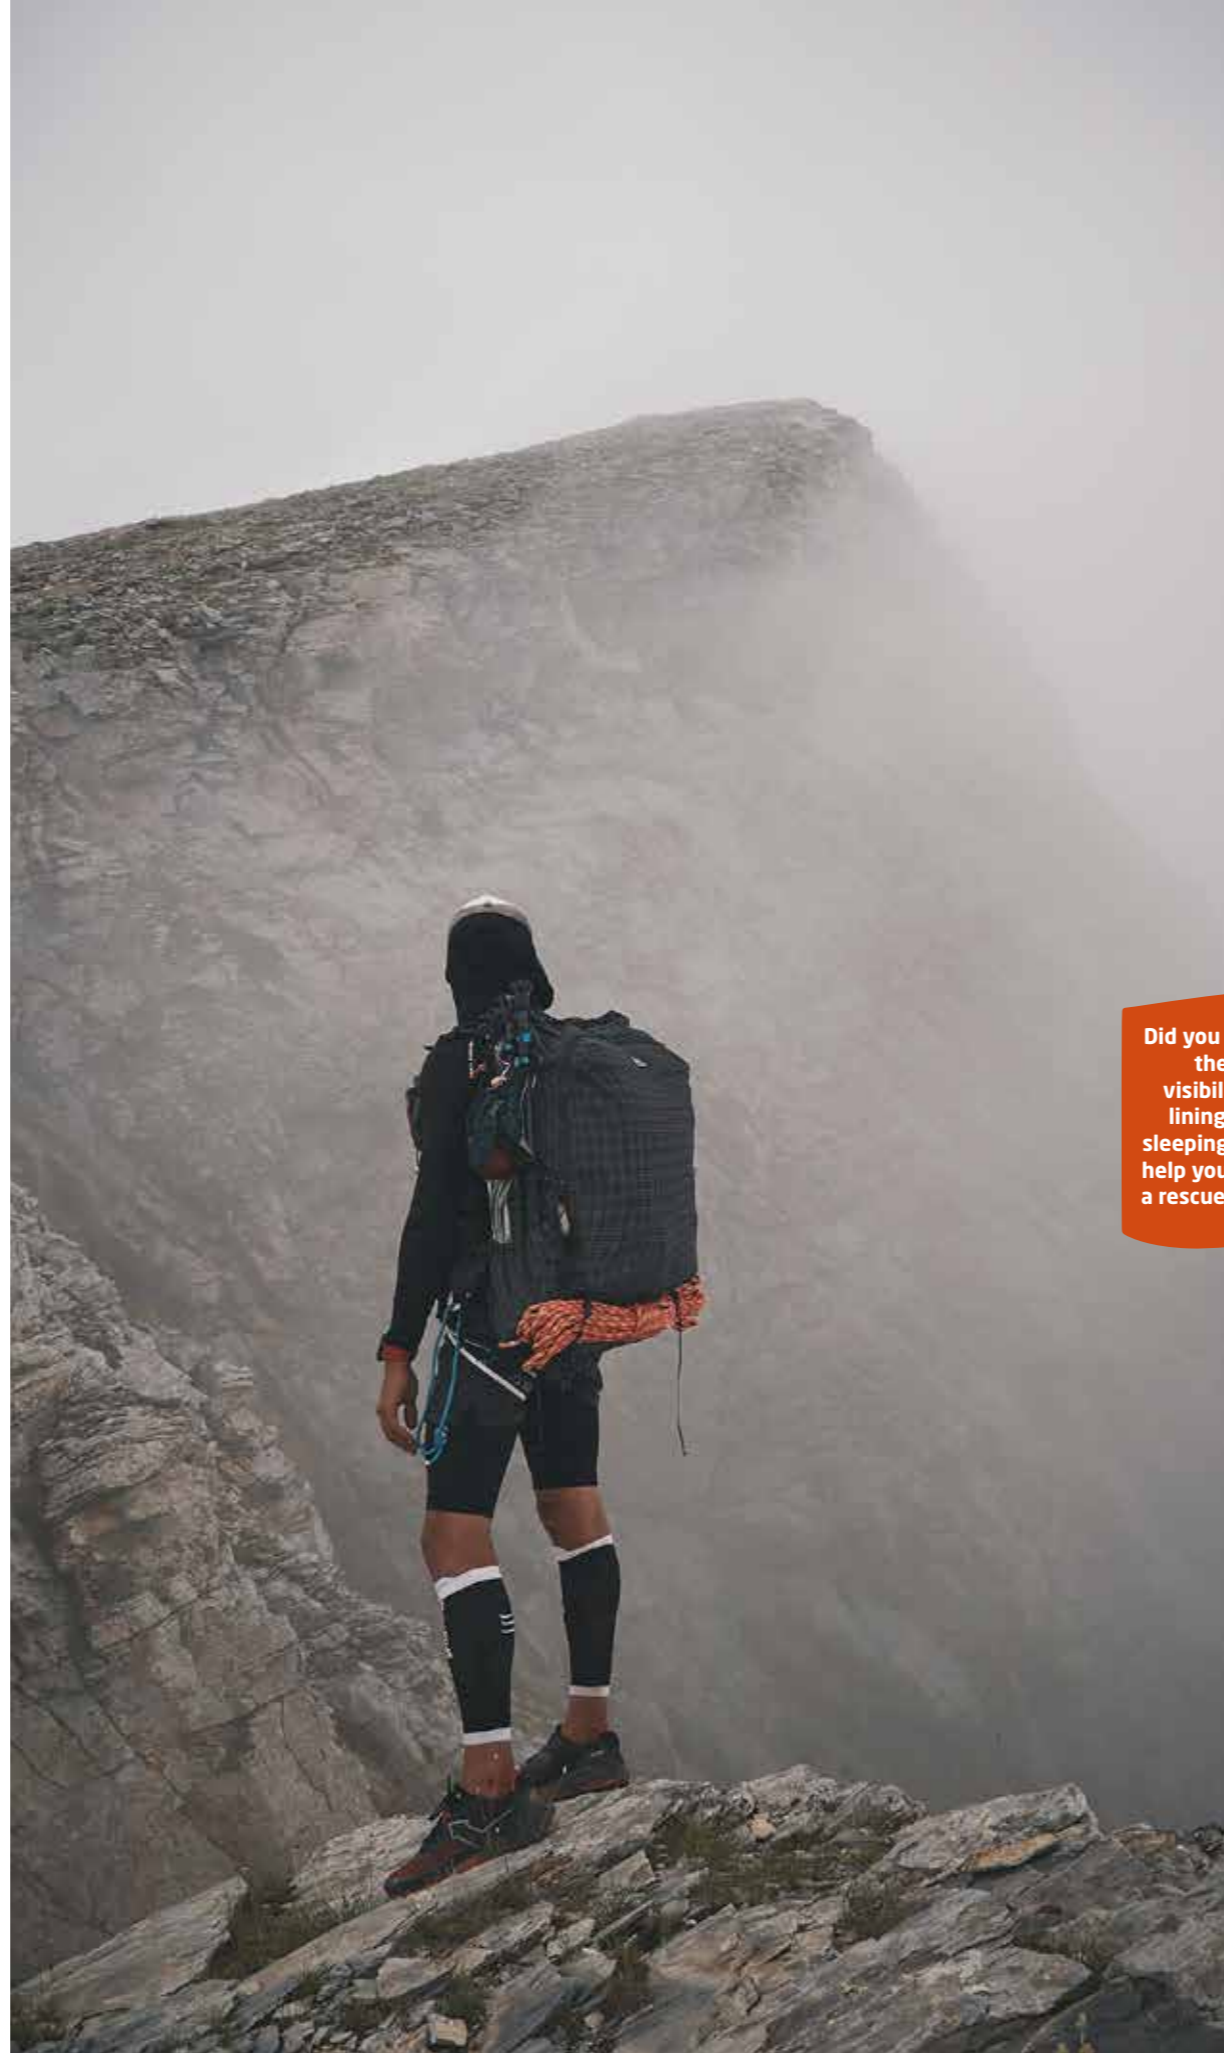

FEVER ULTRA

The world's lightest sleeping bag. Period.

- Ultraslim mummy shape to reduce weight and space
- Angle length zipper, 2-way for great ventilation
- Just 245 g (size M)

Special feature	Packs like an orange

Did you know that the high visibility inner lining of your sleeping bag could help you in case of a rescue situation?

Light as a ghost and shaped to defy physical boundaries.

Phantom is a versatile down sleeping bag that will prove itself a worthy all-year race partner for those who would rather cut some leg room than a hole in their wallet.

ADDITION

"A foam mat is your reliable partner out there. It offers better insulation than air mats and in case of a puncture (we all know that happens), foam mats will still insulate you against the cold ground."

Daniel Krigslund, outdoor adventurer

Could you just sleep on the ground? Yes, probably.
Would it make you go faster tomorrow? Probably not.

Rest is essential to the ultimate performance, so why would you bring anything but the ultimate equipment?

The Nordisk racing mats are ultralight and extremely packable without compromising insulation and are well worth the space they take up in your backpack. We have cut away all unnecessary weight by shaping the mats to cover only what's necessary.

VEN 2.5

The ultimate weight reduction choice

- Covers the area from head to hip
- Self-inflating and easily deflatable
- Highly durable

Material front	100% Polyester, 20D
Material back	100% Polyester, 20D
Net weight	280 g
R-Value	2.3
Colour	Mustard Yellow / Black
Item no.	115006

GRIP 2.5/3.8

Superlight foam sleeping mat

- Body shaped to reduce weight
- Self-inflating and easily deflatable
- Highly durable
- Extra height for added comfort (Grip 3.8)

Material front	100% Polyester, 20D
Material back	100% Polyester, 20D
Net weight	340 -520 g
R-Value	2.3 / 3.6
Colour	Mustard Yellow / Black
Item no.	Grip 2.5 R / 115007 Grip 2.5 L / 115008 Grip 3.8 R / 115009 Grip 3.8 L / 115010

SOLA 15 DRY BAG

Ultra Lightweight Dry Bag

Keep your belongings dry without compromising your travel weight. Attachable shoulder straps even allow you to swim easily with your essentials safe.

Colour	Forest Green / Burnt Red
Measurements	38 x 25,5 x 15,5 cm
Material	100% Nylon
Net weight	Bag 41 g / Straps 15 g
Vol.	15 L
Item no.	133046 / Forest Green 133047 / Burnt Red

THE 2 KG CAMP

You know that every gram counts if you have to carry it up a mountain. At night. In a blizzard. With someone chasing you, whether it is a wild animal or your closest race rival.

But did you know that Nordisk can supply an entire 2 person camp with less than 2 kilos of weight in your bag? Even with room enough to add some nightcamp Hygge® to keep motivation intact when your body tells you to abort your mission.

Tent, mats, sleeping bags, insulation for 2 persons: less than 2 kilos

Lofoten 2 ULW - 2 person tent	540 g
Fever Ultra down sleeping bag	280 g
Oscar fibre sleeping bag	320 g
Strato men's down jacket	155 g
Alto women's down vest	120 g
Ven 2.5 foam sleeping mat, 2 pcs	560 g
Total weight for 2 persons	1.975 g

Add some extra Hygge®

Brewers Cup coffee & brewer	42 g
Nordisk titanium mug	78 g
Nordisk Polar Bear	32 g
	152 g

NORDISK CARE & REPAIR

HOME OF THE DOWN SPECIALIST

NORDISK CARE & REPAIR

Zolli has been sewing sleeping bags for us for more than 30 years. She knows everything about how to make the perfect sleeping bag!

HANDMADE IN GERMANY FOR ALMOST 40 YEARS

Since 1983, we have been crafting our down filled sleeping bags in Germany, by hand. A rare and proud tradition that would have been easy to abandon by finding cheaper labour and rent elsewhere on the planet. Instead, we chose to do the opposite since high quality matters to us.

In 2020, we invested in a new state-of-the-art facility in Görlitz to carry on this tradition with pride and dedication. By staying close to our customers in Europe, we offer unique services, extraordinary quality and a guarantee that your product is made to last forever. **We fix it all!** Sustainability begins with products that last.

With skilled craftsmanship and modern service facilities placed locally in Europe, we can ensure a fast, reliable and easy service on all products, so you can enjoy nature with a clean conscience.

NORDISK CARE & REPAIR

SUSTAINABILITY BEGINS WITH PRODUCTS THAT LAST!

Prolong your product lifespan

A careful selection of sustainable materials and production processes is only half the journey to a truly sustainable product. Expanding the product lifespan is really the simplest and most obtainable way to ensure our pact with nature. By buying quality products, built to withstand the surroundings you use it in, and designed to last, you can save our precious environment tons of CO₂ emissions.

Repair service

In the unlucky case of breakage or damage to your product, we offer in-house repair service by our highly skilled machinists. Chances are that it may be the same person who made your sleeping bag in the first place. Whether your product has a tear, need a new zipper or simply need a refill of down to restore the fill power, our repair service is a quick and highly qualified solution to your needs.

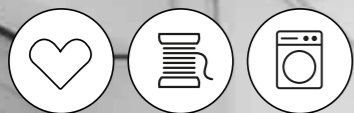

Wash service

Down products are often chosen because they are naturally light, airy and fluffy. But they can be a bit difficult to handle when it comes to cleaning. Both down and technical fabrics are delicate and require special treatment to maintain its high natural quality.

That is why we offer a unique wash and care service for all our products, making sure they will last a lifetime, for the benefit of your wallet and the Nature we care so deeply for.

Nordisk Care & Repair visitors centre

Do you wish to see how a high quality handmade down sleeping bag is actually made?

Come visit our facility, see and experience this unique process during a tour of our factory. Bring your work team or special guests for a day out or a seminar.

You might think that down is just a great filling for a jacket or sleeping bag to keep you warm, but to us it is a science since there are so many possibilities. It is an adventure that we are very proud to take part in.

Your passion is also our passion.

DOWN VS. FIBRE

Choosing which type of sleeping bag you will buy starts with the choice between the two options for filling: A down filled bag or a fibre filled bag. Each filling has its own advantages:

Down

As opposed to fibre filling, down is a natural material and is by definition a more sustainable choice. Nordisk only uses 100 % traceable European white goose down, giving you the highest possible quality and a guarantee that no animals suffer to provide you with insulation. Please refer to our Ethical Down Code.

In addition to the responsibility factor, down bags are extremely soft and have a unique weight to temperature ratio. With down, you get a ridiculously small pack size and an extremely low weight. The down bag is, however, more vulnerable to moisture and getting wet which requires a stricter discipline when handling the bag.

Down breathes better than any other material. Furthermore, down and small feathers absorb the moisture emitted by the body much better than most other materials, offering you a soft, dry sleeping experience.

Down is NOT the same as feathers, as down grows under the outer layer of the feathers on geese and duck and have filaments that link to other down plumules creating air pockets. It is these air pockets - and not the down itself - which provide the fantastic insulation. The general rule of thumb is that the fewer feathers, the better,

which is measured as a percentage where 90/10 means that the mix includes at least 90% down and 10% feathers and other particles. Nordisk only uses high quality European down, Crystal Down, with a special treatment to make them quicker drying as well as preventing odour and mould on the down.

Nordisk down are RDS certified, to secure animal welfare and additionally measured and labelled by EN standards and complies with the EDFA Down Codex and traceability (European Down & Feather Association), which is the only standard which also includes monitoring of actual down standard. The EDFA Down Codex is monitored and controlled by third party (IDFL - International Down & Feather Laboratories).

Fibre

Fibre filling is a synthetic product made from polyester, and it is very popular because of its high level of insulation, its durability, because it dries fast, and it only requires a minimum of maintenance. Actually, today most sleeping bags are made with fibre filling.

The Nordisk Norguard S-PO Eco filling is made from 100 % recycled polyester.

Fibre filling ensures a sleeping bag with a pleasant and soft feel combined with high elasticity and a very good heat insulation. Fibre filling is additionally highly durable even over long term, and it requires only a minimum of maintenance.

Compared to down, a synthetic sleeping bag requires less care in cleaning and storage - and it also performs better when wet. Furthermore, since synthetic filling is less costly than down, a fibre bag offers good value for less money.

Down filling

CRYSTAL DOWN®

We develop equipment for expeditions exploring the coldest areas of the world and therefore, all our products are filled with Crystal Down® - a selection of the absolute finest and most voluminous European down.

Crystal Down® - a masterpiece of nature

Mother nature ensures that all our sleeping bags and garments are highly insulating and keeps you warm while surprisingly light. The secret is the finest insulation material known to man; down - they keep birds warm and yet light enough to fly. Nothing beats Mother Nature. Down are by nature highly packable as they resist a small amount of pressure but gives in under stronger pressure. The down withstand the impact and return to their initial form when uncompressed.

Gentle but tough

The down that warms the goose's chest and belly are excellent. Thousands and thousands of super-soft, keratin filaments grow radially outwards from a tiny centre. Each of these filaments contains innumerable tiny, branch-like fibres with nearly invisible hooks. When the down are packed together, they attach themselves to each other and build thousands of tiny, warmth-retaining air chambers. This natural solution is lighter, more flexible and better insulating than anything that humankind has ever developed.

The loftier, the fluffier

Down are static masterpieces with a fill power (loft) that resists a small amount of pressure but gives in under stronger pressure. Loft is measured by laboratories under the supervision of the International Down and Feather Laboratory (IDFL) in Salt Lake City, USA. The higher the volume, the higher the loft and the quality. Our special down achieve the highest possible bulking power of up to 900 cubic inches. In recognition of its large, organically grown power and beauty they are called Crystal Down®.

Crystal Down® Dry

Down has a tendency to collapse when wet which has kept down fanatics a bit frustrated under very humid conditions. But not anymore. It is possible to prevent the down from absorbing water. That's why we call Crystal Down® treated with this technology Crystal Down Dry®. In 2014, we started to fill the jackets Mode and North with this innovative kind of down. Today we are using Crystal Down Dry® in a large number of products including the Arctic range of high-end sleeping bags and the range of down filled rain jackets.

Down variants

Crystal down is divided in the following

600 / 90-10 Crystal Down

A good loft for most products. Clean feel and relatively light. Provides good insulation and nice breathability. Not the lightest of mix, but one of the warmest if weight is not so important (but still lighter than fibre fillings).

700 / 90-10 Crystal Down

The value for money mix. Here you almost get the very nice feel and breathability of the more expensive and finer down, but at a lower price and a higher weight. They perform very well and are often our go to down in testing and comparing.

700 / 90-10 Crystal Down Dry

Here we use our good experience from the regular down, but making them hydrophobic. These down goes in a lot of our rain-down garments and hardcore sleeping bags. We recommend these in moist or wet areas where you need the extra protection.

750 / 95-5 Crystal Down

When nerdiness pays off. The loft is just a bit higher, and the mix sorting process is a bit longer, but it pays off in performance. You hereby have a down that ensures you better temperature protection at a lower weight and ensures a bit higher breathability.

800 / 95-5 Crystal Down

When the going gets tough and you need the lightest of products to get to your goals. The down being so fine, it can be combined with the finest of nylons and give very low weights and pack sizes. This down is for when performance matters!

900 / 95-5 Crystal Down

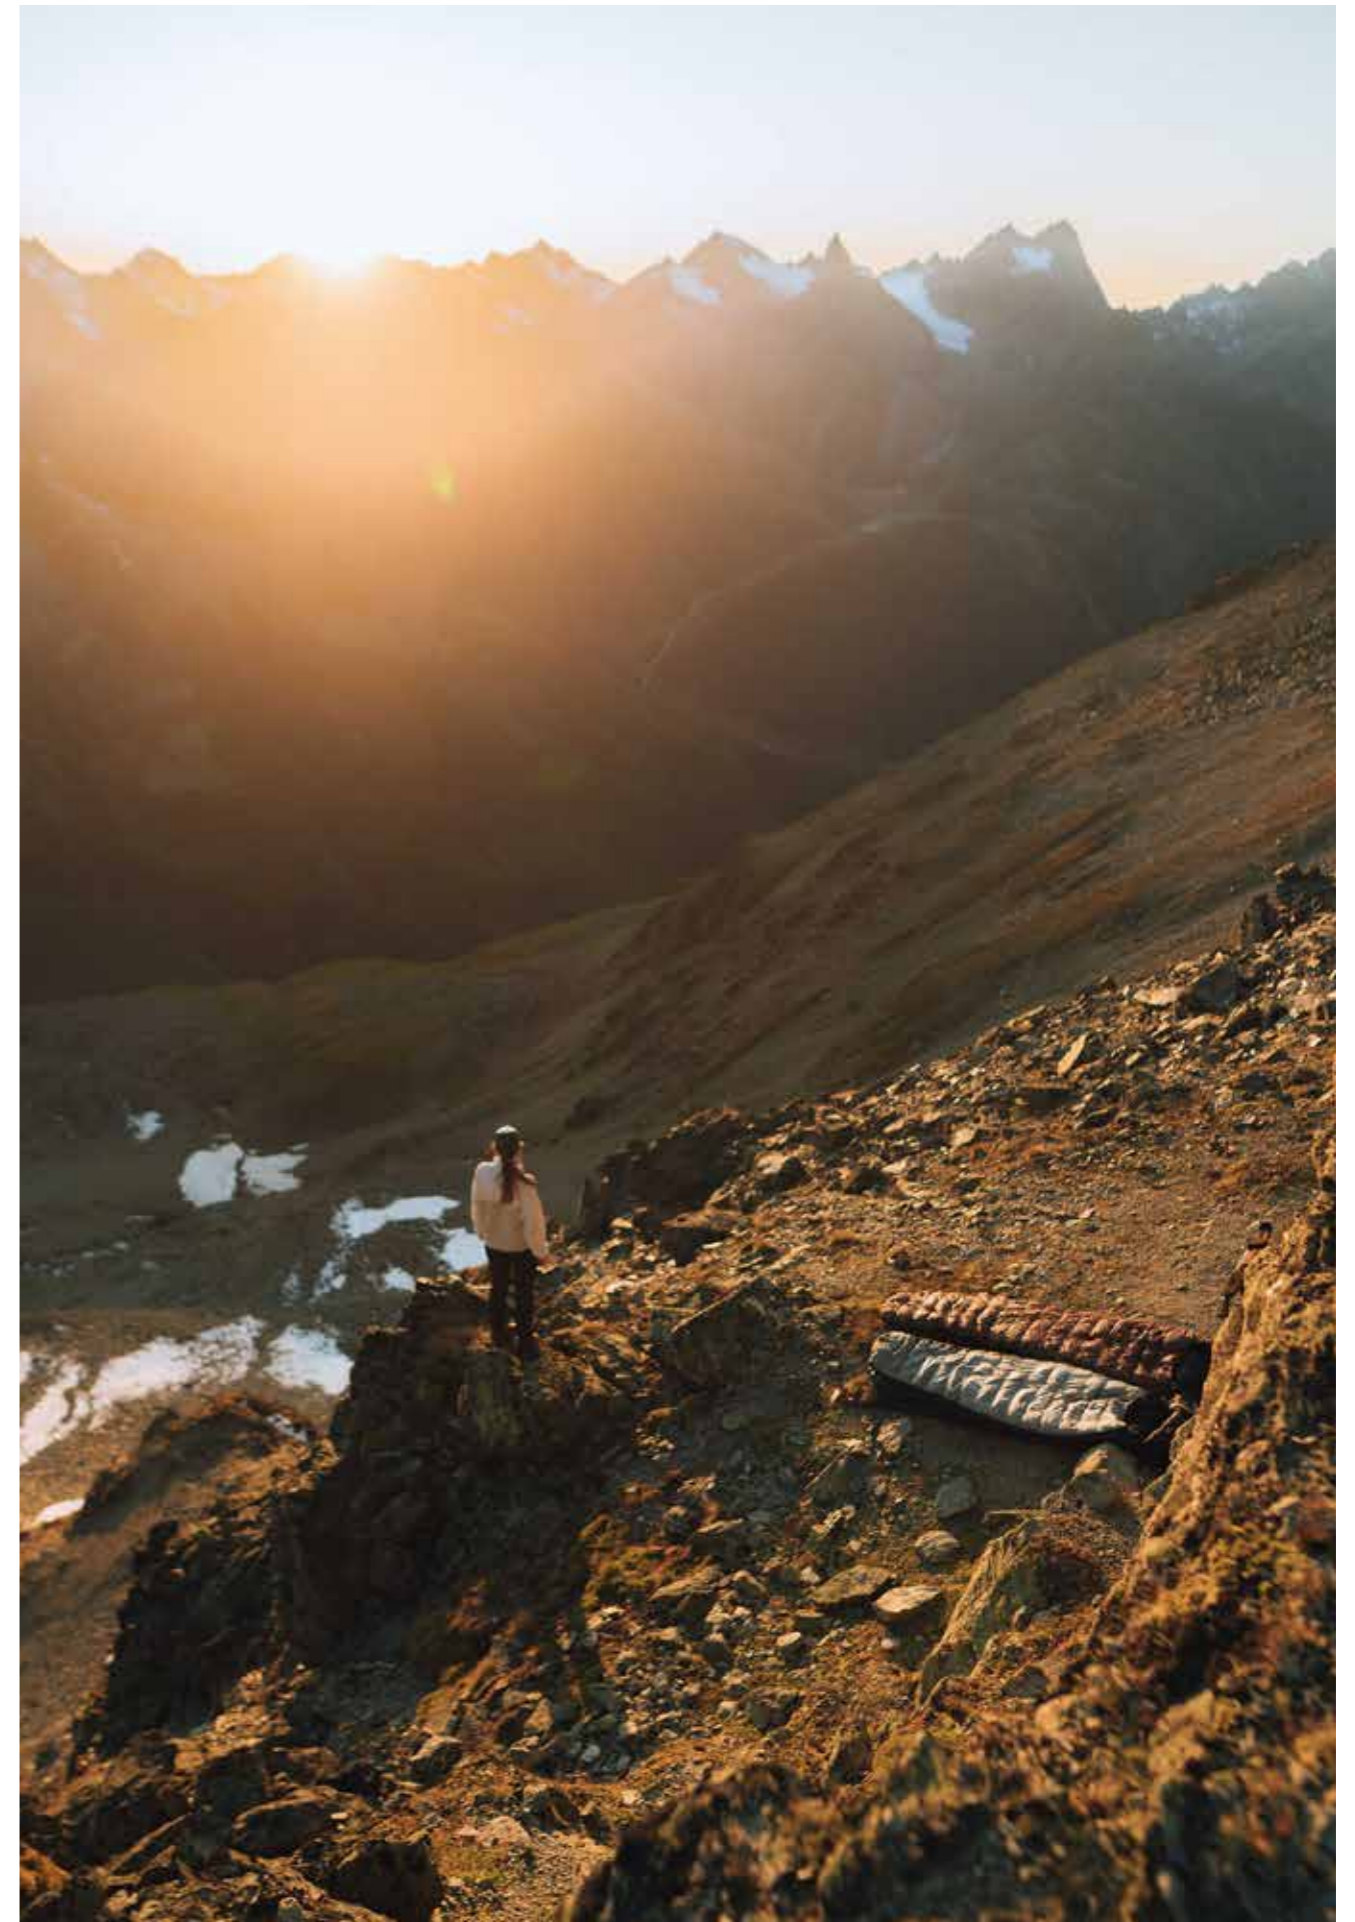

Absolute high end down. The most fluffy down available and the ones creating the best heat to weight ratio. Only used in our most radical addiction products and of course our Worlds Lightest products. Unbeatable performance, unbelievable weight.

FACT!

600 - 900+ Fillpower defines the loft of the down. The higher loft, the less down (weight) you need to make the same temperature insulation.

FACT!

90/10 - 95/5 mix, defines the mix percentage of Down and Feathers. The less feathers, the lower weight.

Fibre filling

Norguard S-PO 80

Specially Nordisk developed synthetic fibre filling with soft touch and high loft providing extra warmth for a comfortable sleep. Norguard is non-allergenic and meets Öko-Tex Standard 100.

- Soft touch
- High loft
- High elasticity
- Low maintenance
- Non-allergenic

Norguard S-PO Softcell

Norguard S-PO Softcell, specially developed for Nordisk, is a breakthrough within synthetic fibre filling as you are getting the best of both worlds. With the soft handfeel of down but the performance of synthetic, with its quick-dry properties, Norguard Softcell is practical and comfortable at the same time.

- Handfeel of down
- Quick-dry properties
- Extremely soft

Norguard S-PO Eco

Norguard S-PO Eco is 100% recycled PET. It is a hybrid fibre filling based on a unique mix of micro denier and hollow fibres providing maximum insulation and at the same time a unique dry and very comfortable inner climate - almost no matter the conditions. The hollow fibres optimize the transportation of moisture from bodyheat and the micro denier provide an extreme softness. Together this combination creates a unique micro climate with a distinct and positive effect on perspiration and condensation, thus enhancing comfort.

Furthermore, this special construction makes the filling very flexible and durable, which will prove very useful if you for example wash the sleeping bag often.

- 100% recycled fibre
- Extreme softness
- Ultra high warmth to weight ratio

Norguard S-PO 85

Specially Nordisk developed synthetic fibre filling with extremely soft touch, low maintenance and significantly high loft providing optimal warmth for a the perfect sleep. Norguard S-PO 85 is non-allergenic and meets Öko-Tex Standard 100.

- Extremely soft touch
- Significantly high loft
- Long lifetime
- High elasticity
- Low maintenance
- Non-allergenic

Norguard S-DO 700-90

For Nordisk down products there are placed particular value on a high quality down according to strict standards of animal welfare. Norguard S-DO 700-90 gives perfect insulation yet maintaining a lofty and airy climate for a good night's sleep. In short, for you Norguard down means:

- 600+ cuin minimum fill power
- Lighter weight compared to synthetic fibre
- Focus on animal welfare
- European down

Norguard S-PO S-Core

Norguard S-PO S-Core is a highly technical synthetic fibre filling which has taken the leading position in the market when it comes to extreme softness combined with insulation value.

A breathable membrane combined with a layered fibre construction creates a multi-faceted and versatile performance as each layer offers its own unique benefit. The membrane is effectively transformed into a virtual pump, actively drawing moisture away while retaining warmth within.

- Extreme thermal efficiency
- Breathable membrane
- Versatile performance capabilities
- All time dryness
- Draws away moisture while retaining warmth within

Sleeping bag features

Contour Hood/3D Hood
With draw cord for optimal heat retention.

Secondary Shoulder Zipper
To stick the arm out while leaving the chest area covered/insulated.
*applies to selected AMBITION and ADDICTION sleeping bags.

Technical Label
Located along zipper opening. Clear information about EN tested temperature rating and composition.

Chamber Gap Zipper
Concealed, can be opened to lower the insulation value in warmer nights.
*applies to selected ADDICTION sleeping bags.

Soft Touch Lining
For pleasant hand feel and cosy, comfortable nights. Breathable and fast drying.

Footbox Opening
To allow for ventilation in warmer nights.
*applies to selected AMBITION and ADDICTION sleeping bags.

Thermal Collar
To prevent cold from entering the bag.
*applies to Nordisk 3-Season, Winter and Extreme bags.

Zipper Garage
No cold metal against your face. Temperature indication on zipper garage.

Nordisk Zipper Puller
For easy grip.

Zipper Protection
Parallel stitching to prevent zipper from snagging and avoid scratching edges, which traditional zipper protection bands often causes.

Zipper Draft Tube
Preventing cold spots.

Inner Pocket
Easy reachable inner pocket for storing valuables smartphone readable through mesh.

Reversed 2-Way Zipper
Appropriate zipper length chosen according to each style, season and usage.

*reference picture shows Gormsson -2° Curve

Season description

SUMMER ABOVE +4

If mainly using a sleeping bag in warmer temperature, then the Nordisk high summer bag is the right choice. At Nordisk, we like to keep it simple, and therefore all Nordisk summer bags are constructed to reach a +10°C temperature rating, however, anything above +4°C is categorised as a Summer bag. A summer bag is used for warm climate. It is often humid and plenty of ventilation is therefore required. A Nordisk summer bag comes with full length zipper to maximize ventilation. The hood construction is contoured to cater as a comfortable blanket for your head during the warmer nights. If needed the hood can be tightened around your head to provide more heat. In warmer climate a sleeping bag is often used fully open, and there is no need for it to be tightened closely around your body. For this exact reason summer bags are not constructed with a neck baffle.

3-SEASON +3 TO -2°

The majority of sleeping bags sold are 3-Season bags as this is the most versatile bag which can be used in a lot of conditions as long as it is not too cold. All Nordisk 3-Season bags are constructed to reach -2°C rating but temperature rating from +3°C to -2°C is considered a 3-Season bag. A 3-Season bag is ideal for the Nordic climate. It is not too big and bulky nor too warm for the average Nordic summer nights. As it can get cold at night during summer, a summer bag might be too cold. A 3-Season bag still provides plenty of ventilation options. It is constructed with full length zipper but different to the summer bag it has a 3D hood as well as a neck baffle to cater for colder nights where you want to keep all heat in the bag.

WINTER -3 TO -15°

Nordisk winter bags are only available in the mummy shape as all cold spots are kept to a minimum, performance is key and mummy bags offer the optimal heat retention. Nordisk winter bags reach -10°C, however anything from -3°C to -15°C is considered a Winter bag. A winter bag is used for expeditions and is for the more experienced segment of the outdoor market or for guided tours where winter sleeping bags are required. All winter bags are constructed with knee-length zipper to prevent heat loss but still allow for comfort and ventilation. The hood is fitted, and neck baffle applies to cater for optimal insulation.

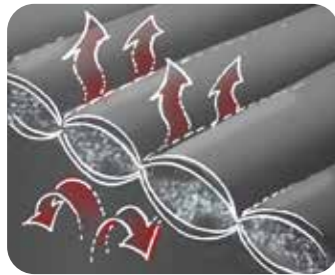

EXTREME BELOW -16°

For extreme expeditions with very cold climate Nordisk Extreme bags are the go to. They rate at -20°C but anything from -16°C to -25°C falls into the Extreme category. An extreme bag is used for expeditions only and is purely performance driven. Comfort inside the bag is important as you often live in the bag for many hours a day when you are not moving. This also means the bag need to cater for this providing a bit more room for reading, eating and perhaps wearing clothes and boots inside the bag. All Nordisk Extreme bags have got waist length zipper to prevent heat loss but still allow for comfort and ventilation. The hood is fitted and can be closed tightly around the head to keep in the heat. Furthermore, the extreme bags are designed with a hood baffle and a neck baffle.

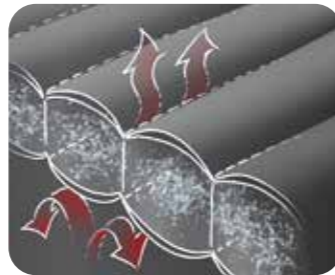

Construction Details

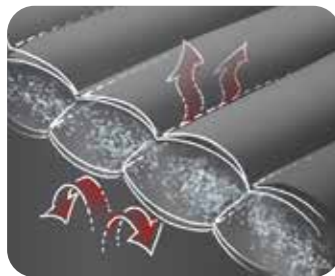

The construction of the sleeping bag defines how the filling is kept in place and layered inside the bag. This defines how well the filling insulates and ultimately decides in how cold environments the sleeping bag can be used.

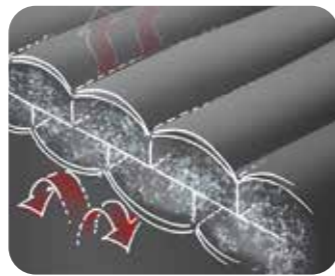

Stitched Through
The most simple design for a sleeping bag is to use the stitched through construction. Using this method the shell and lining are stitched together directly on top of each other to create the chambers into which the filling is inserted.

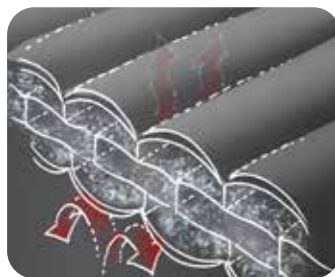

H-Box
The H-box, H-chamber or Box Wall Construction is divided into different chambers with vertical side walls to keep the insulation in place and to avoid cold bridges. This ensures a uniform thickness of insulation all through the sleeping bag.

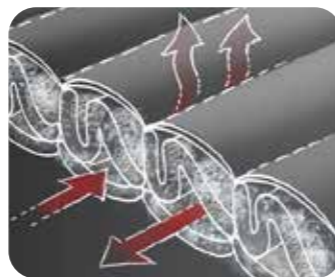

S-Box
A slanted wall construction creates a more difficult path for heat to escape along the relatively low-density insulation area against the side wall. This improves the thermal efficiency of the bag even more than H-box construction.

Offset double box wall
The two box wall layers, one on top of each other, have their baffle walls offset relative to each other, which creates an appearance similar to that of a brick wall. Often used in bags with a large amount of filling - typically for extreme conditions.

Offset triple box
Offset triple box is basically designed as the Offset Double Box wall construction, but with an extra layer. The third layer adds to the unique insulation by increasing the volume and the temperature level. Best suited for sleeping in extreme cold.

Tubic
With tubic construction technology a pair of arched insulation fibres runs in a vaulted formation through the entire length of the vertical thermal channels. The added loft traps more air, increases heat distribution and reduces heat escape options. The result is a 3-dimensional loft optimization and higher thermal efficiency.

Sleeping Bag / Shape

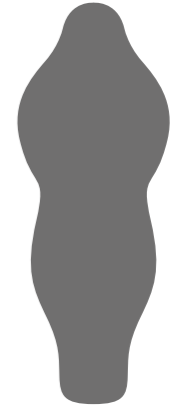

Blanket
The Nordisk rectangular Blanket shape is highly rated due to its versatile use. It can be used as a regular sleeping bag, or a blanket, if you find it uncomfortable being enclosed inside the bag.

Egg
Nordisk Egg shape offers a good balance between insulation and space. Freedom of movement is at its most. This is often of interest to the user who does not use the sleeping bag frequently, and who is not exposed to extreme temperatures.

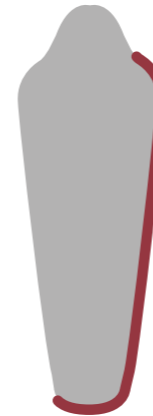

Mummy
Nordisk Mummy shape is fitted the human body contour, offering a snug fit with optimal insulation properties as air gaps are kept to a minimum. The Mummy shape is ideal for any outdoor enthusiast to whom performance is key.

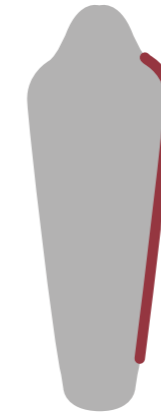

Curve
The Curve shape by Nordisk is the optimal balance between insulation and space. The majority of people sleep in a "running" position where the body makes an S-shape. The Curve shape allows more comfort and space for this position.

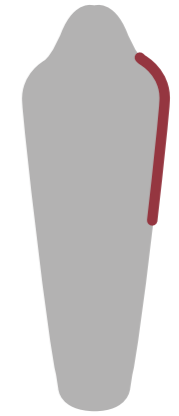

Sleeping Bag / Zipper

Complete Zip
This zipper allows to completely open the sleeping bag, front and back laying flat.

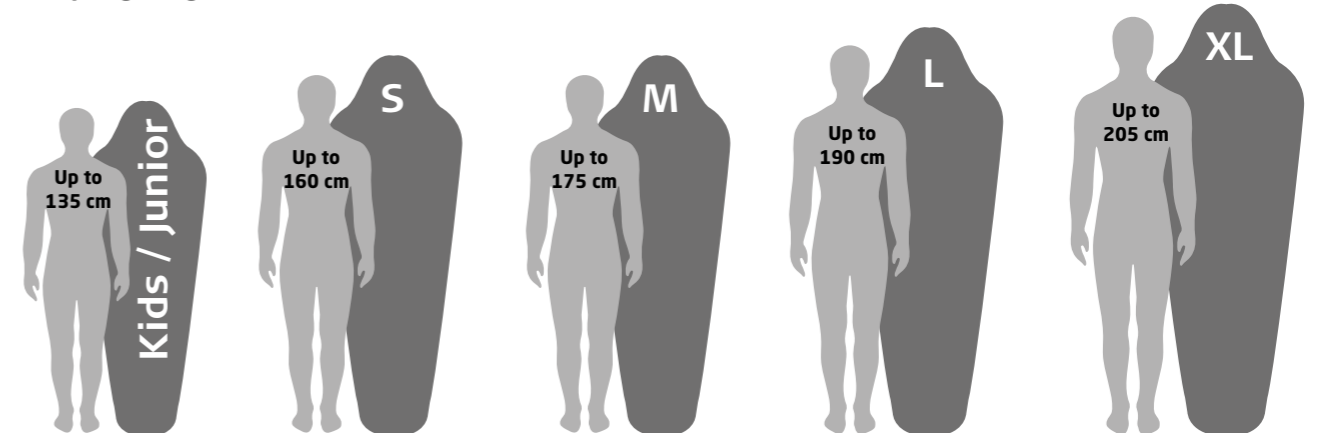

Side Zip
This zipper allows to open the sleeping bag, but keep the feet warm in the closed footbox.

Half Side Zip
This zipper saves on weight and pack size and is best used on lightweight/race sleeping bags.

Sleeping Bag / Size

Nordisk sleeping bags are measured from the top of the hood to the footend. Measure your full Body Length to find the ideal sleeping bag size. All sleeping bags measure 20 cm more than the recommended Body Length.

Tent Fabric

NORDISK COTTON

Flysheet, Technical Cotton

Composition: 65% Polyester / 35% Cotton
 Construction: Technical weave
 with breathable finish
 Weight: 210 g/m²
 Water column: 350 mm

Inner Tent

Composition: 65% Polyester / 35% Cotton
 Floor: 150D Oxford Polyester
 Weight: 105 g/m²
 Features: Breathable and
 water repellent

Mesh

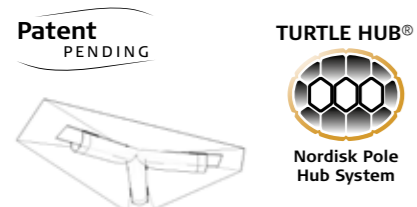

Composition: 100% Nylon
 Construction: Mosquito Mesh

Groundsheet

Composition: 150D Tarpaulin
 REACH compliant
 Construction: Coated mesh
 Weight: 540 g/m²
 Water column: 100% waterproof

Turtle Hub®

The Turtle Hub® is a flexible padded pole hub system consisting of individual pole pockets sharing the same reinforced "shell", creating a perfect hold and an even tension distribution from the poles. The Turtle Hub® provides extraordinary stability and prevents individual poles from moving against or away from each other, thus it becomes possible to create pole structures like A-frames or T-junctions without using bulky connections or additional connector elements. Even though a tent construction would be based entirely on single poles that are not connected to one another, the Turtle Hub® will provide massive strength and stability, hold the poles tight and distribute pushing force evenly.

Example position for Turtle Hub - all individual poles meet protected under the shell

FACT!

What is Technical Cotton?
 Technical Cotton is characterised by high breathability and higher durability, due to the mix of the natural features of cotton combined with the strength of man-made polyester yarn.

Tent Fabric

NORDISK PU

Flysheet

Composition: 100% Polyester
 Construction: Rip-stop
 Treatment: UV 45+ filter and PU
 Yarn thickness: 68D

 Yarn thickness: 20D / Lofoten 15D
 Weight: 53 g/m²
 Water column: 8000 mm

FACT!

What is PU?
 Ideal for the occasional or first time outdoor hiking experience, where you wish to stay overnight and still be well protected.
 PU is short for Polyurethane. This fabric treatment gives you rain protection and strong stability. Oh yes, and then there are the taped seams. Perfect in any weather conditions.

FACT!

What is SI?
 The trekkers choice. Lightweight and strong without compromise in rugged conditions.
 SI is short for Silicone. This fabric treatment ensures your tent a better flexibility and offers a lighter yet stronger result. SI gives you rain protection and thereby a high degree of a dry experience despite rain.

New weight definition:
Total weight (excl. hangtag)
Net weight (excl. packsacks, bonus pack, repair, footprint, and canopy poles)
Trim weight (minimal functional weight)

GREAT AND INDISPENSABLE ACCESSORIES FOR YOUR SLEEPING BAG

Cotton Liner Blanket
Item no. 106004

Organic cotton storage pouch
Item no. 106010

Storage bag
Item no. 0660 / 0661

*Standard temperature testing according to EN13537 is not applicable for children's sleeping bags. For tiny tots and young adventurers we therefore provide a NORDISK temperature range recommendation that takes into account the subjective sensation of cold, depending on age, physique and activity level.
